CAREER SUMMARY

I am a Computer Science student at RGPV, Bhopal, with a strong focus on MERN stack and blockchain development . I work as a freelancer on real-world web and blockchain projects and am actively involved in communities like Bhopal DAO and E-Cell RGPV, where I collaborate with like-minded innovators, developers, and tech enthusiasts.

SKILLS

- **Web Dev :** React.js, Next.js, Express, Node.js
- **Programming Lang:** JavaScript, TypeScript, Java
- **Blockchain Dev:** Solidity, Ether.js, Rust, Anchor
- **UI Dev:** Tailwind, Material UI, ShadCn

PROJECTS

1. Acc3ss – *Decentralized Event Handling Platform*

Built a dApp enabling event organizers to create and manage events on-chain, with ticketing and attendee verification handled via smart contracts for transparency.

🔗 *https://acc3ss.xyz/*

2. Mintify – Blockchain-based Supply Chain Security

Developed a supply chain tracking system on Ethereum ensuring authenticity and preventing counterfeit products using smart contracts and NFT-based verification.
